CET Aquadent is mixed into the drinking water and can be used in both cats and dogs. IT uses the same active ingredient in human chewing gum (xylitol) to decrease plaque and tartar accumulation by 50%!

Tooth brushing for dogs and cats is the most efficient way to clean the entire mouth on a daily basis. Toothpaste flavors include Poultry, Beef and Seafood. The tooth brush uses soft bristles and is designed to be used on all sizes of pets.

CET chews for cats and dogs will effectively clean the main chewing teeth when used once to twice daily. The dog version is a rawhide chew impregnated with dental enzymes. The feline version is shaped to brush the tooth while cats chew it.

Greenies are a daily treat for dogs and cats and have been clinically proven to decrease plaque and tartar buildup by 50 to 60%. Greenies are NOT recommended for dogs that do not chew treats thoroughly or swallow things in large pieces.

Hills T/D prescription tartar control diet will reduce tartar by up to 45%. It uses a unique brushing action due a larger shaped biscuit and is designed to be fed as an exclusive daily diet. It is 100% guaranteed or your money back!

The Kong Dental Chew stick is a great brushing toy for dogs who love to chew! By adding toothpaste to the grooves it allows for a session of brushing and exercise for the teeth and gums.
